Human Nectin-2/CD112 Protein

Cat. No. NEC-HM202

Description

Source	Recombinant Human Nectin-2/CD112 Protein is expressed from HEK293 with hFc tag at the C-Terminus.
	It contains Gln32-Leu360.
Accession	Q92692-2
Molecular Weight	The protein has a predicted MW of 62.3 kDa. Due to glycosylation, the protein migrates to 70-80 kDa based on Tris-Bis PAGE result.
Endotoxin	Less than 1EU per μg by the LAL method.
Purity	> 95% as determined by Tris-Bis PAGE
	> 95% as determined by HPLC

Formulation and Storage

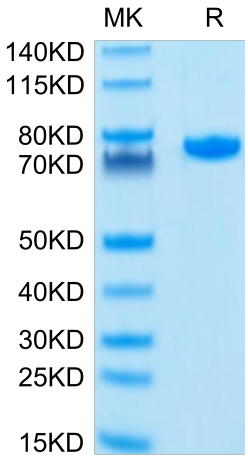
Formulation	Lyophilized from 0.22μm filtered solution in PBS (pH 7.4). Normally 8% trehalose is added as protectant before lyophilization.
Reconstitution	Centrifuge the tube before opening. Reconstituting to a concentration more than 100 μg/ml is recommended. Dissolve the lyophilized protein in distilled water.
Storage	-20 to -80°C for 12 months as supplied from date of receipt. -80°C for 3-6 months after reconstitution. 2-8°C for 2-7 days after reconstitution. Recommend to aliquot the protein into smaller quantities for optimal storage. Please minimize freeze-thaw cycles.

Background

Nectin-2 is an adhesion molecule that has been reported to play a role in tumor growth, metastasis and tumor angiogenesis. Nectin-2 expression in ovarian cancer may support tumor cell adhesion, leading to growth and lymph node metastasis. Effect of VEGF on Nectin-2 expression as well as permeability was investigated in HUVEC.

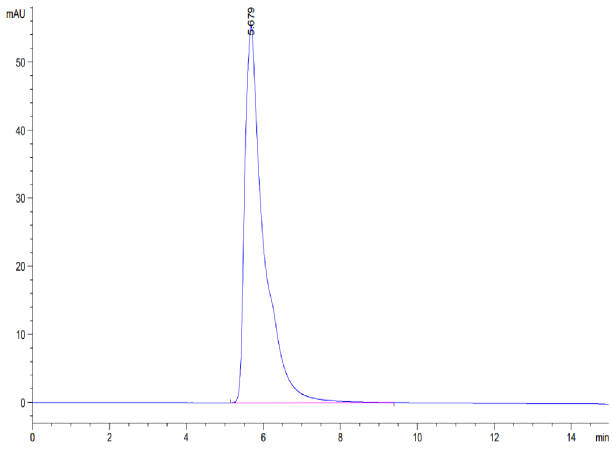
Assay Data

Tris-Bis PAGE



Human Nectin-2 on Tris-Bis PAGE under reduced condition. The purity is greater than 95%.

SEC-HPLC



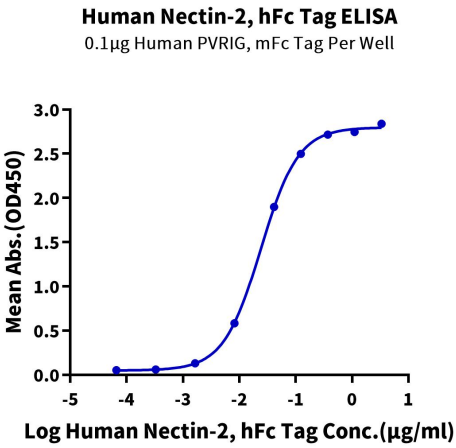
The purity of Human Nectin-2 is greater than 95% as determined by SEC-HPLC.

Human Nectin-2/CD112 Protein

Cat. No. NEC-HM202

Assay Data

ELISA Data



Immobilized Human PVRIG, mFc Tag at 1μg/ml (100μl/well) on the plate. Dose response curve for Human Nectin-2, hFc Tag with the EC50 of 24.1ng/ml determined by ELISA.
